About Me

Senior Android Developer with 10+ years of experience and over 50 projects delivered in B2B and B2C sectors. Specialized in native Android development and cross-platform frameworks (Flutter, KMM), with advanced expertise in BLE, NFC, GPS, AI, and AR. Skilled in Clean Architecture and SOLID principles, with a strong focus on IoT and home automation. Passionate about innovation, high-quality software development, and performance optimization.

Degree in Computer Science and Engineering

Technical Skills and Competencies

Expert in mobile development for IoT, Home Automation, Food & Beverage, Transport, Telco, and Streaming. Specialized in Android Kotlin, Jetpack Compose, Coroutines, and Clean Architecture (SOLID, MVVM). Extensive experience with Flutter, KMM, Firebase, and Play Console. Expert in advanced testing (JUnit, Mockito, Robolectric) and managing complex builds with Gradle. Focused on UX optimization, performance, and development best practices.

Relational and Organizational Skills

I speak English at a C1 level and I am always enthusiastic and passionate about my work, with a constant eye on innovation. I am efficient in problem-solving and organize myself autonomously, without ever losing sight of attention to detail and quality. My passion for my field drives me to stay constantly up to date, to continuously improve my skills and provide increasingly effective solutions.
